Contributors	xii
Frontispiece	xiii
Preface	1
1 Introduction	
NORMAN C. LEPLA, FRANK M. DAVIS & JOHN C. SCHNEIDER	
I. History of Modern, Professional Insect Rearing	3
II. Diversity of Reared Insects	4
III. Major Success Stories in Insect Rearing	5
IV. Education in Insect Rearing	6
V. Future Opportunities and Challenges for Insect Rearing	7
References	8
2 Insectary Design and Construction	
WILLIAM R. FISHER	
I. Introduction	9
II. The Design Process	
A. Functional Goals	10
B. Owner Responsibilities	10
C. Test and Balance	13
III. Preparing the Facility for Initial Use	13
IV. Insectary Components	
A. Structural Elements	14
B. Environmental Control Systems	18
C. Miscellaneous Equipment	24
D. Compartmentalization	26
E. Alternatives to Conventional Facilities	31
F. Layout and Traffic Control	31
G. Phytophagous Cultures	33
V. Large Scale Insectaries: Unique Design Considerations	
A. Size	35
B. Minimizing Cost per Insect Produced	35
C. Site Selection	36
D. Screwworm Insectary, Tuxtla, Mexico: An Example	38
VI. Conclusions	40
Acknowledgements	41
References	41
3 The Insectary Manager	
WILLIAM R. FISHER	
I. Introduction	43
II. Leadership	44

A. Leadership Qualities	45
B. Leadership Styles	45
III. Problem Solving	46
IV. Planning and Organization	
A. Planning Process	47
B. Standard Operating Procedures	48
C. Scheduling Procedures	48
D. Planning for Contingencies	54
E. Organization	57
F. Assigning Responsibilities	57
G. Coordinating Resources	58
V. Managing Personnel	
A. Hiring	59
B. Training Employees	61
C. Facilitating Performance	62
D. Evaluating Performance	62
VI. Managing in a Crisis	64
VII. Conclusions	65
References	66
Appendix 1: Questions for Job Candidates	67
Appendix 2: Detailed Performance Objectives: An Example	68
Appendix 3: Employee Competencies by Experience Level	69

4 Health and Safety Issues in Rearing Arthropods

JOHN P. REINECKE

I. Introduction	71
A. Safety, Occupational Health, and Environmental Protection (SOHEP)	72
B. Regulation and Enforcement	72
II. General Occupational Health Hazards and their Prevention	
A. Electrical	73
B. Mechanical	74
C. Thermal	75
D. Acoustical	76
E. Chemical	76
III. Occupational Health Hazards Peculiar to Insectaries	
A. Allergens	77
B. Pathogens	79
IV. Prevention of Hazards Peculiar to Insectaries	
A. Sanitation	79
B. Personal Protection Equipment (PPE)	79
V. Administration of Insectary Safety	
A. Best Management Practices for Safety	83
B. Safety Officer/Committee	83
C. Safety Training	84
VI. Conclusions	84
References	85

5 Genetic Considerations and Strategies for Rearing High Quality Insects

MICHAEL A. CAPRIO

I.	Introduction	87
II.	Processes of Genetic Change	
	A. Genetic Drift	88
	B. Selection	90
III.	Quality	91
IV.	Maintaining Genetic Quality	
	A. Amelioration of Genetic Drift	92
	B. Amelioration of Selection	94
V.	Conclusions	95
	References	95

6 Environmental Biology of Insect Rearing

JOHN C. SCHNEIDER

I.	Introduction	97
II.	Light	97
	A. Phototaxis	98
	B. Circadian Rhythms	100
	C. Diapause	103
	D. Population Growth	106
III.	Temperature	
	A. Circadian Rhythms	106
	B. Diapause	108
	C. Population Growth	110
IV.	Humidity	
	A. Units of Measurement	114
	B. Population Growth	115
V.	Conclusions	117
	References	117

7 Insect Nutrition, Feeding, and Artificial Diets

MUHAMMAD F. CHAUDHURY

I.	Introduction	121
II.	Nutrition and Dietetics	
	A. Nutritional Requirements	122
	B. Dietary Components	123
	C. Nonnutritive Dietary Additives	129
III.	Insect Feeding	
	A. Insect Mouthparts	131
	B. Feeding Stimulants and Deterrents	132
	C. Physical Characteristics of Diets	133
	D. Evaluating Diet Quality	134
	E. Measures of Food Utilization: Nutritional Indices	134
IV.	Digestion, Absorption, and Metabolism of Nutrients	
	A. Digestion	135
	B. Absorption	139
	C. Metabolism	140
V.	Developing an Artificial Diet	140
	A. Starting Diet	141

B. Testing	141
C. Troubleshooting	141
D. Modification	141
E. Additional Considerations	142
VI. Conclusions	143
References	143

8 Microbial Contamination and Insect Rearing

G. DOUGLAS INGLIS & PETER P. SIKOROWSKI

Dedication	150
I. Introduction	150
II. What is Microbial Contamination?	151
A. Bacteria	152
B. Fungi	153
C. Diversity and Characterization of Microorganisms	156
D. Saprotrophic Microorganisms	156
III. Consequences of Microbial Contamination	
A. Detrimental Effects on Insects	157
B. Detrimental Effects on Humans	162
C. Beneficial and Benign Effects	163
IV. Sources of Microbial Contamination	164
A. Air	165
B. Personnel	166
C. Insects	166
D. Diets and Diet Ingredients	168
V. Monitoring for Microbial Contamination	
A. Air	172
B. Personnel	176
C. Diets and Diet Ingredients	176
D. Insects	181
E. Processing Equipment and Workrooms	182
VI. Managing Microbial Contamination	
A. Air Filtration	184
B. Insect Diets	190
C. Workrooms and Equipment	211
D. Personnel	213
VII. Conclusions	216
Acknowledgments	217
References	217

9 Entomopathogens and Insect Rearing

G. DOUGLAS INGLIS & PETER P. SIKOROWSKI

I. Introduction	224
II. Disease Agents	224
A. Viruses	225
B. Bacteria	234
C. Fungi	241
D. Protozoa and Microsporidia	248
E. Nematodes	254

III. Beneficial Symbioses	256
IV. Disease Manifestations	
A. Acute	258
B. Chronic	258
V. Disease Development	260
VI. Disease Diagnosis	
A. History	263
B. Physical Examination	264
C. Ancillary Examination	270
D. Submission for Diagnosis	271
VII. Disease Management	
A. Prevention	271
B. Therapeutic Measures	274
VIII. Conclusions	278
Acknowledgments	278
References	278
Appendix A: History of Disease Data Sheet	285
Appendix B: Physical Diagnosis Data Sheet	286
Appendix C: Laboratory Diagnosis Data Sheet	287
Appendix D: Final Diagnosis Data Sheet	288

10 The Basics of Quality Control for Insect Rearing

NORMAN C. LEPPLA

I. Introduction	289
II. Colony Establishment and Maintenance	290
A. Purposes for Rearing Insects	291
B. Types of Insect Rearing Systems	291
C. Options for Colonizing Insects	292
D. Maintaining the Quality of Colonized Insects	293
III. Monitoring Quality	
A. Quality Control Criteria and Standardized Tests	295
B. Sampling for Consistent Quality	296
C. Production, Process, and Product Control	297
IV. Evaluation and Management	
A. Structured Diagnostic Procedures	299
B. Quality Control versus Methods Improvement	299
C. Periodic Review versus Crisis Review	300
V. Guidelines for Quality Systems	301
VI. Total Quality Management	301
VII. Conclusions	304
Acknowledgments	304
References	304

11 Insect Rearing Production Systems, A Case Study: The Southwestern Corn Borer

FRANK M. DAVIS

I. Introduction	307
II. Developmental Stages	
A. Egg	310

B. Larva	312
C. Pupa	318
D. Adult	320
III. Colony Genetics	324
IV. Microbial Management	
A. Standard Operating Procedures	325
B. Insectary Design	325
C. Air Filtration	326
D. Hygiene and Sanitation	326
E. Stress Reduction	326
F. Control of CBW Gonad-Specific Virus	327
V. Quality Control	327
VI. Insectary Pests	329
VII. Planning and Record Keeping	330
VIII. Equipment	330
IX. Conclusions	331
Acknowledgments	331
References	332
Index	335
